Department of History
Jadavpur University
Former Pro-VC of Burdwan
University

ABOUT THE WEBINAR:-

Development of human society and culture largely depends on natural phenomena. Similarly public health and environment together may be considered as two of the most important components to analyze the characteristics of urban growth of civilization. Issues like health, environment and urbanization were highly dynamic during the period of colonization of Bengal. Looking at the current situation there is an utter need of considering the above mentioned issues as their understanding would lead us to face the present problems in better way. Therefore these thoughts lead us to the conceptualization of the concerned webinar.
